

ANTHONY TEED

Senior Software Engineer

📞 1 (941) 247-8187

✉️ anthonyteed9@gmail.com

📍 Venice, FL, US

WORK EXPERIENCE

Senior Software Engineer

RevStar

📅 10/2020 - Ongoing 📍 US

Provide cloud-native solutions for businesses that need secure, scalable and cost-effective applications

- Developed responsive web and single page app using React.js
- Translating UI/UX design wireframes into code while producing high-quality markups and reusable component
- Develop iPhone and Android mobile apps using React Native utilizing Redux for enhanced maintainability
- Improved server query response time by caching and improving SQL queries
- Developed a microservices-based architecture with Node, Docker, Kubernetes, PostgreSQL, and Elasticsearch for online platforms that serve millions of users hourly

Project Lead Developer

CTemplar

📅 11/2017 - 09/2020 📍 US

An email security management software offering anonymous end-to-end encrypted protection to individual users

- Developed the application utilizing Angular while managing the State through NgRx allowing for real-time comparisons of choices saving hours of users time
- Implemented the encryption feature using GPG and RSA encryption
- Involving in communicating with business analysts and creating design documents for business requirements
- Mentor and empower junior developers through knowledge transfer and coding guidance
- Familiarity with software development best practices: source control systems, unit testing, documentation, automated build environments, and agile software development

Frontend Developer

Bitfinex

📅 07/2013 - 10/2017 📍 US

A digital asset trading platform offering state-of-the-art services for digital currency traders and global liquidity providers

- Working on frontend of web and mobile application development using React and React Native
- Implemented complex microservices using AWS lambda and API Gateway
- Build Bitfinex Honey, UI library and related features with smart contract developers and backend developers
- Implemented trading features using MetaMask and Wallet connect
- Collaborated with the UX/UI design teams to improve the website and applications, increasing conversion rates by 25%

Software Engineer

Siemplify

📅 10/2009 - 06/2013 📍 US

the #1 Independent SOAR platform to manage Security Operations from a Single Platform

- Coded using Javascript, HTML and CSS for main features
- Simplified reporting delivering actionable information servers allowing them to take corrective action on over-leveraged budgets
- Implement Data visualization with Graph, Dashboard, Chart, Machine Learning and dependencies
- Add user authentication & authorization process using JWT and Passport and implement testing using Jest, Cypress, etc

SUMMARY

- Senior Full Stack Developer with 10+ years of proven leadership and meaningfully contributions to teams of varying size and scope.
- Creative Front-End Developer offering 10+ years of experience providing high-impact web and mobile solutions for diverse industry organizations.
- Extensive experience in design, development and testing of high availability and scalable Web and Mobile applications.
